

Design meets Performance

The New PRx 6 Reader Generation

Meet our new PRx 6 reader generation. The new, timeless design provides a premium look whilst the proven deister reading performance ensures fast and smooth operation. In addition to the established reading technologies, Bluetooth® and NFC™

are supported as well. For low light operation, the keypad is illuminated and the three LEDs clearly indicate the reader's status to the user. The access control readers are available in Cosmic Black and Astral Grey.
