

Online product information and training

deister electronic presents the deister Academy and deister Portal

Barsinghausen, **April 26, 2018** – The long-established company [deister electronic](#) GmbH – now successfully launched on the market for 40 years – is with its online activities on the ravage of time: On the occasion of the anniversary the RFID-specialist presents two new web offers for customers and business partners to keep them up-to-date on the technology and application of the innovative deister products.

deister Academy

The new, free-to-use **e-learning platform** was especially developed for deisters business partners. Anyone who is interested in, can acquire his knowledge about the current product lines, solidify and expand his existing knowledge and you can also test, if you are still up-to-date in topics like technology or application. The deister Academy also offers sales trainings, installation videos and application notes. Thereby it is a very good addition to the already offered offline trainings.

deister Portal

As a timely and all-round optimized replacement of the established Mediapool, the deister Portal offers a clearly sorted interface and direct access to the complete documentation of all deister product lines. Our partners, customers and users will find **brochures, datasheets, manuals, pictures, videos and references** on the online-platform.

„We investigated more than one year, to develop the new information and e-learning platform” explains Nicolas Stobbe, Head of Business Development at deister electronic. „The users not only stay up to date, they can also browse through our offer and discover yet unknown product areas for themselves.”

Press Announcement
