

deister electronic again receives industry award for security management and security solutions

What a kick-off to this year's Security in Essen: A jury of experts and readers of GIT SICHERHEIT magazine were so positively impressed by the bloxx property management system this year that they awarded it second place in the Security Management and Security Solutions category.

Barsinghausen, 09 October 2018 - On the first day of the Security Fair 2018 in Essen, Rouven Franke, Head of Sales Team - DACH and Klaus Göppert, Head of Design & Construction at deister electronic GmbH, accepted the second place in the Security Management and Security Solutions category of the GIT Security Award 2019: "We are very pleased to receive this award and would like to take this opportunity to express our sincere thanks to all the votes that made this second place possible for us. We see this award as a confirmation of our hard work and as a motivation to continue the development of high-quality and innovative solutions that make life easier for you as a customer in the field of safety and automation," says Rouven Franke.

Earlier this year, deister electronic's bloxx system convinced the jury of experts of the INNOVATION AWARD IT and the INDUSTRIEPREIS of Huber Verlag für Neue Medien and was awarded "Best OF 2018". deister electronic's bloxx system allows you to safely and fully automatically manage and store equipment and valuables. The intelligent software of the system knows which equipment is being used by whom at any time and thus guarantees more transparency and information regarding the actual need for equipment. This guarantees more safety and effectiveness at the workplace.

The international GIT SICHERHEIT Award is an annual reader award from Wiley-VCH Publishing. More than 75,000 readers of Wiley Print magazines and the associated online communities of GIT-SICHERHEIT.de, GIT-SECURITY.com, md-automation.de and PRO-4-PRO.com use online voting to vote in 5 categories to determine the respective winners.

About deister electronic

For 40 years, deister electronic has been an internationally modern and sustainably managed family business that stands for innovative and safe automation solutions. With five international locations, we sell our solutions worldwide and have a strong international focus. Our solution portfolio is used, for example, in the following applications: Long-range identification for access control, access control to buildings, automatic management of work equipment and valuables in electronic locker systems, dispensing and management of textiles for laundry and hospital logistics.
