Deister Commander®
Key and asset management system

deister electronic

Features That Make a Difference:

- Seamlessly integrates with C•CURE 9000 security and event management system.
- Provides additional CCURE User capability for physical key and asset authorization and control.
- Maintain an Audit Trail of physicaly Key & Asset Acquisition and return.
- A single administrative interface can now manage door access and assets including shared credentials and one time enrolment.
- Enables proxSafe Lock® principle for C•CURE 9000 hardware.
- Supports Remote Release of KeyTags.

Deister Commander Driver for C•CURE 9000

Extend the capability of your C•CURE 9000 system and apply the same control, alarm and audit capabilities to physical keys, radios, weapons and other assets.

Map your existing users into access “beyond the door”©. With C•CURE 9000 and the Deister Commander Integration, Physical Access Control is not just portals anymore.

The power of C•CURE 9000 now extends to key cabinets; weapons lockers; radio lockers; and other assets. Harness the power of RFID to ensure theses critical assets are utilized by the right person at the right time and that they are returned on time. Manage door access based upon key possession—restricting egress until a critical asset is properly returned.

C•CURE 9000, when combined with Deister’s RFID based Key and Asset Management, extends the secure space from area security to include item and control security.
