

# deisterexpo - The digital exhibition with top-class security solutions

**deister electronic's digital exhibition of high quality security solutions for companies and public institutions is now available 24/7.**

**Barsinghausen, April 2<sup>nd</sup>, 2020** - With the digital exhibition "deisterexpo" deister electronic GmbH in cooperation with its sales team would like to inform you virtually about secure automation solutions in the areas of long-range identification, access control, key management and asset management as well as present and demonstrate new solutions. Take a virtual tour of the exhibition booth and experience deister electronic's innovative solutions from a safe distance 24/7 in the form of short explanatory videos. Click here to visit the virtual exhibition stand: [www.deister.com/en/deister-expo/](http://www.deister.com/en/deister-expo/).

Especially in the current situation it is important to protect yourself as a company or public institution from criminal attacks in every way and to automate as many processes as possible to increase efficiency.

At the digital exhibition "deisterexpo", the competent sales staff of deister electronic will explain how secure automation solutions can be used in your company in a targeted manner so that you are better prepared for the future. The security solutions from deister electronic are already often used in the following sectors:

- Government agencies and ministries
- Chemical and pharmaceutical companies
- Healthcare
- Education and research institutions
- Transport and logistics companies
- Financial service providers
- Automotive industry
- Military
- Police and Law Enforcement

## Press Release

### About deister electronic

For 40 years, deister electronic has been an internationally modern and sustainably managed family business that stands for innovative and safe automation solutions. With five international locations, we sell our solutions worldwide and have a strong international focus. Our solution portfolio is used, for example, in the following applications: Long-range identification for access control, access control to buildings, automatic management of work equipment and valuables in electronic locker systems, dispensing and management of textiles for laundry and hospital logistics.
